

K-373

GOLF CLUB GRIP TAPE DOUBLE COATED PAPER TAPE

APPLICATIONS

A high performance double coated paper tape. Designed as a golf club grip tape that can be used with a wide variety of mineral spirits or golf gripping solvents. Preferred by golf OEM and re-gripping operations for applying a wide variety of golf grip types onto steel, graphite and titanium shafts. The modified rubber adhesive allows for easy installation of the golf grip without pushing excess adhesive down the shaft requiring clean up after installation.

Suitable for photograph mounting, steel rule make-ready holding applications and a wide variety of general purpose mounting and fastening applications.

FEATURES/BENEFITS

- Specially formulated adhesive allows golf grips to slide on easily with a fast setup time.
- Crepe paper backing is conformable for smooth application around the club shaft.
- High shear rubber adhesive on both sides that bonds equally well to a variety of surfaces.
- Easy to use in table-top dispensers that remove the release liner or in applications where the tape needs to be hand tearable.

TECHNICAL DATA

Adhesive	:	Modified Rubber
Carrier	:	Beige Crepe Paper
Release Liner	:	White Crepe Paper
Total Thickness	:	6.5 mils (0.17mm)
Tensile Strength	:	23 lbs per inch of width (40.3 N/10mm)
Adhesion to Steel	:	50 oz per inch of width (5.25 N/10mm)
Elongation	:	10%
Service Temperature	:	50°F to 150°F (10°C to 66°C)
Standard Length	:	36 yards (33 meters)

Note: The above are typical values obtained from tests recommended by the PSTC, ASTM, or government agencies and should not be used in writing specifications. The product should be thoroughly evaluated by the user under actual conditions with intended substrates to determine if the product is suitable for the application.
